-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

***Claim Rejections - 35 USC § 112***

Claims 5 and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The manner by which the bottom bars are held together so as to be detachable is not adequately disclosed.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 17 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by the prior art as depicted in present Fig. 6.

The magnets are in lines that are “adjacent” to respective edges of the window covering.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over present Fig. 6 in view of Wojtysiak.

Wojtysiak shows that it is common to locate lift cords at the edges of the covering. In view of this teaching, it would have been obvious to provide the cords of Fig. 6 closer to the edge of the covering, as well as to use more cords, so that the edges do not sag when the covering is drawn upwardly.

Claims 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Judkins '333 in view of Phillips et al.

Judkins discloses a headrail 10, bottom bar 21, face material 14F and liner 14R, each of which have cord connectors 26F, 26R, respectively, and lift cords 28. The insert and cavity are not shown. However, such is old and well known as illustrated by Phillips et al at 47,46, Fig. 1. It would have been obvious to provide such a support arrangement for Judkins so that the coverings could be easily removed. The use of tape is a well known expedient.

#### ***Allowable Subject Matter***

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 104 and 7-16 are allowed. The prior art does not teach or suggest the two, facing materials having cord connectors and with lift cord extending therebetween, along with material forming loops below the bottom bar.
